We can look at a subset of top hits by using a starting point of +2/-2 log2FC and adjusted p-value of less than 0.05.

```
top.inds <- (abs(res$log2FoldChange) > 2) & (res$padj < 0.05)

Now we can save our top hits to a CSV file

Reactome analysis

To run reactome online you need a text file with one gene ID per line

```
sig_genes <- res[res$padj <= 0.05 & !is.na(res$padj), "symbol"]
print(paste("Total number of significant genes:", length(sig_genes)))
```

```
[1] "Total number of significant genes: 8147"
```

```
write.table(sig_genes, file="significant_genes.txt",
            row.names=FALSE,
            col.names=FALSE,
            quote=FALSE)
```
